1. Identification
Product identifier AxTrap 4001
Other means of identification G1001
Recommended use Hydrogen sulfide removal from gases
Recommended restrictions None known.
General Description Proprietary dry granular filtration media used for selective removal of hydrogen sulfide. Mixed iron oxides on natural zeolite.

Manufacturer/Importer/Supplier/Distributor information
Manufacturer
Company name Axens North America, Inc.
Address 824 Lone Star Drive
O’Fallon, MO 63366
Telephone 636-272-8000
Emergency phone number 636-272-8000

2. Hazard(s) identification
Physical hazards Not classified.
Health hazards Not classified.
Environmental hazards Not classified.
OSHA defined hazards Not classified.
Label elements
Hazard symbol None.
Signal word None.
Hazard statement The mixture does not meet the criteria for classification.
Precautionary statement
Prevention Observe good industrial hygiene practices.
Response Wash hands and clothing after handling.
Storage Store away from incompatible materials.
Disposal requirement Dispose of waste and residues in accordance with local authority

Hazard(s) not otherwise classified (HNOC)
None.

Supplemental information
None.

3. Composition / information on ingredients
Mixtures

other components are below reportable levels or not regulated

4. First-aid measures
Inhalation
Move to fresh air. Get medical attention of irritation develops and persists.

Skin contact
Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact
Rinse with water. Get medical attention if irritation develops and persists.

Ingestion
Rinse mouth, drink plenty of water. Do not induce vomiting. Get medical attention.

Most important symptoms/effects, acute and delayed
Direct contact with eyes may cause temporary irritation.
5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed. Prevent contaminated water from discharge to environment.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
Move containers from fire area if you can do so without risk.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
No unusual fire or explosion hazards noted. Decomposition products may include iron oxides at high temperatures.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up
Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Environmental precautions
Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling
Avoid prolonged exposure. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities
Store in original tightly closed container. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls / personal protection

Occupational exposure limits

<table>

</tr>
</tbody>
</table>

Biological limit values
No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection
Wear safety glasses with side shields (or goggles).
Skin protection

Hand protection

Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove supplier.

Wear suitable protective clothing.

Other

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment, NIOSH-MSHA approved, N95 or better rated respirators are recommended along with user training, repair/cleaning, and fit testing.

Suitable gloves can be recommended by the glove supplier.

Wear suitable protective clothing.

10 lbs./gal. estimated

Explosive properties

Not explosive.

Oxidizing properties

Not oxidizing,

Percent volatile

10 % estimated

Specific gravity

1.2 estimated

10. Stability and reactivity

Reactivity

The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability

Material is stable under normal conditions.

Possibility of hazardous reactions

No dangerous reaction known under conditions of normal use.
Conditions to avoid
Contact with incompatible materials.
Incompatible materials
Strong oxidizing agents,
Hazardous decomposition products
No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

<table>
<thead>
<tr>
<th>Route</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inhalation</td>
<td>Prolonged inhalation may be harmful.</td>

</tr>
</tbody>
</table>

Reproductive toxicity

| Effect                      | This product is not expected to cause reproductive or developmental effects. |

Specific target organ toxicity - single exposure

| Effect                      | Not classified. |

Specific target organ toxicity - repeated exposure

| Effect                      | Not classified. |

Aspiration hazard

| Effect                      | Not an aspiration hazard. |

Chronic effects

| Effect                      | Prolonged inhalation may be harmful. |

Further information

| Effect                      | This product has no known adverse effect on human health handled appropriately. |

12. Ecological information

Ecotoxicity

| Effect                      | The product is not classified as environmentally hazardous. However this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment. |

Persistence and degradability

| Effect                      | No data is available on the degradability of this mixture. |

Bioaccumulative potential

| Effect                      | No evidence to indicate significant bioaccumulative potential. |

Mobility in soil

| Effect                      | No evidence to indicate significant mobility in soil. |

Other adverse effects

| Effect                      | No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component. |

13. Disposal considerations

Disposal instructions

| Effect                      | Collect and reclaim or dispose in sealed containers at licensed waste disposal site, |

Local disposal regulations

| Effect                      | Dispose in accordance with all applicable regulations. |

Hazardous waste code

| Effect                      | The waste code should be assigned in discussion between the user, the producer and the waste disposal company. |

Waste from residues / unused products

| Effect                      | Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions). |
Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information
DOT Shipping Description: Not regulated for transportation by DOT, TDG, IMDG, ICAO/IATA.

Canada TDG Shipping Description: Not Regulated
UN PIN NO: Not Regulated.
IMDG Shipping Description: Not Regulated.
ICAO/IATA Shipping Description: Not Regulated.

15. Regulatory information

US federal regulations
One or more components are listed on TSCA.
This product or its components are not known to be a “Hazardous Chemical” as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
Not regulated. Notification not required.
CERCLA Hazardous Substance List (40 CFR 302.4)
Not regulated.
SARA 304 Emergency release notification
Not regulated.
OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)
Not listed.

Superfund Amendments and Reauthorization Act of 1986 (SARA)
Hazard categories
Immediate Hazard - No
Delayed Hazard - No
Fire Hazard - No
Pressure Hazard - No
Reactivity Hazard - No

SARA 302
Not regulated.
SARA 311/312 Hazardous chemical
No
SARA 313 (TRI reporting)
No

Other federal regulations
Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List
Not regulated.
Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)
Not regulated.
Safe Drinking Water Act (SDWA)
Not regulated.
USFDA – Primary components are listed as Generally Regarded as Safe (GRAS).

US State Regulations
US. California Controlled Substances. CA Department of Justice (California Health and Safety Code Section 11100)
No.
